homework project: Site map and Wireframes

assignment: Use your research data and preliminary sketches to create detailed and presentable page maps and a site map.

- **Site map**
 - 1 page; recommended software: Power Point or similar.
- **Wireframes (Page maps)**
 - 1 page per sub page (depends upon your site); analog or digital – your choice. sketches are ok. If you choose to create them digitally - recommended software: Power Point or similar.

purpose/objective:

- To organize the structure and layout of your client's website without the constraints of any design elements.
- To create reference materials for client signoff.
- To experiment with user interface combinations prior to designing in Photoshop.

format: Post a link to either the images (gifs or jpegs) or an acrobat document (pdf) on your main class web page before class begins.

reading: None
