INTERFACE DESIGN II

LESSON
TIPS, TRICKS, & TECHNIQUES…

USING MULTIPLE CSS FILES

» Why use multiple CSS files?

  » To avoid any redundant code!

» Recommended Approaches:

  » For small sites, either use:

    » One large CSS file

      » You will probably need to use some unique ID's on each page

      » Example: universal.css

    » One universal CSS file plus several page-specific CSS files

      » Example: universal.css, pagex.css, pagey.css, pagez.css

  » For large, complex sites

    » Multiple CSS files

   » Example: universal.css, home.css, sub.css, pagex.css, pagey.css, pagez.css
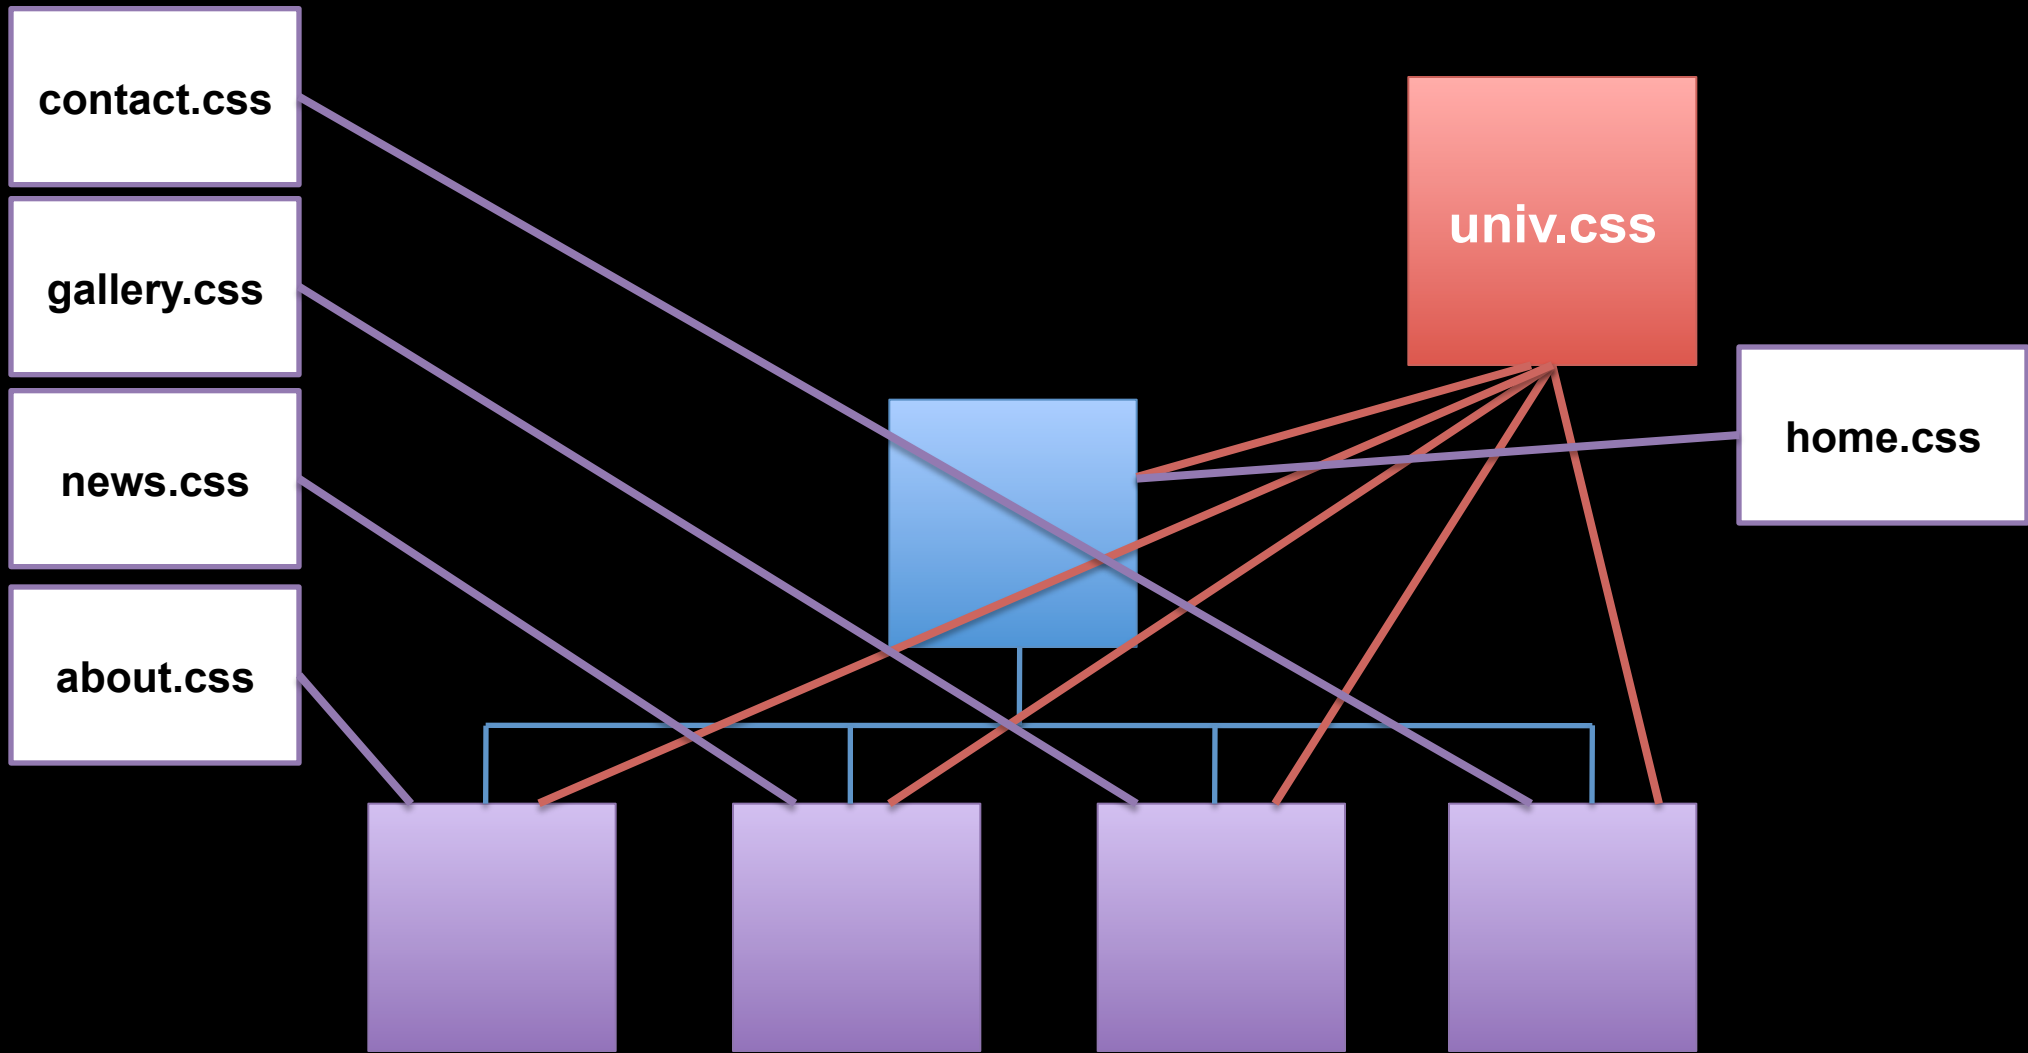

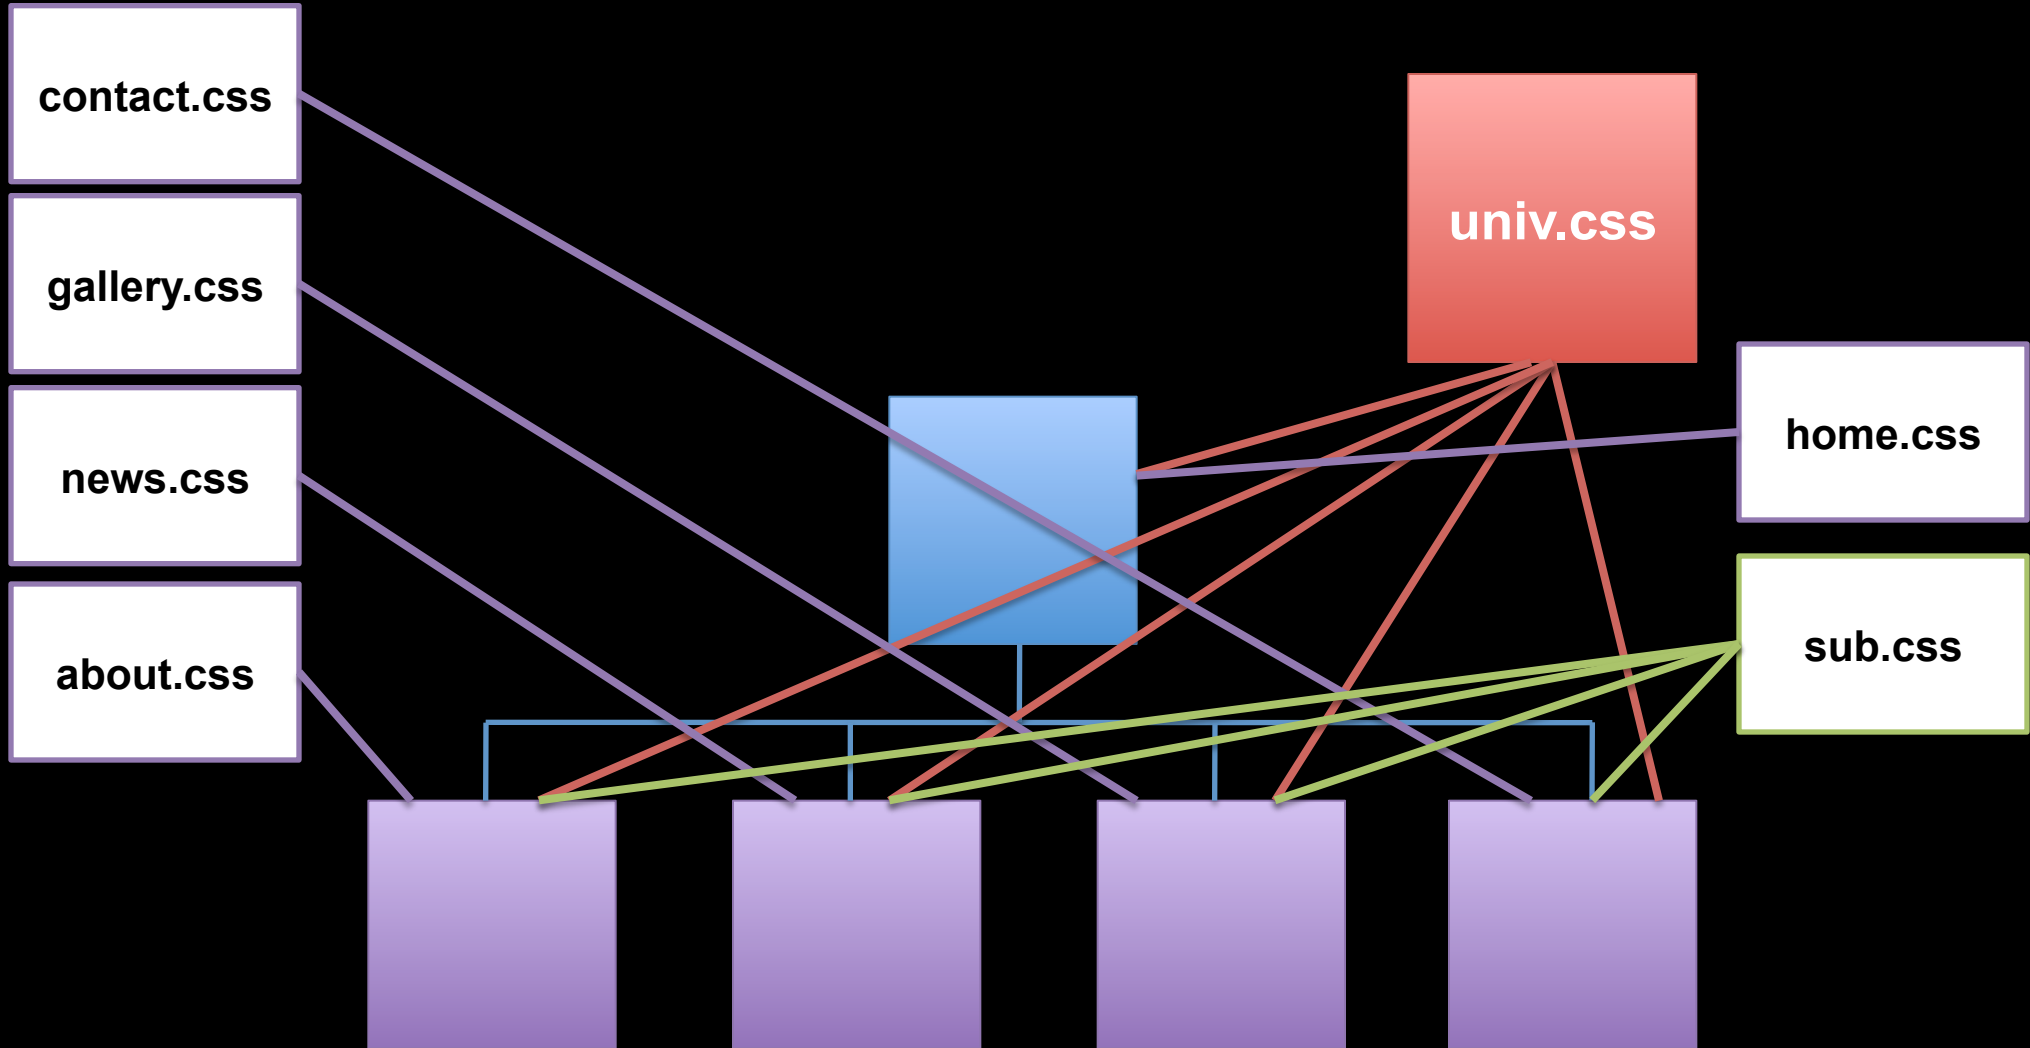

SINGLE CSS
FOR SMALL WEB SITES

univ.css

REDUNDANT CSS
NOT RECOMMENDED!

contact.css

gallery.css

news.css

about.css

home.css

UNIV CSS + PAGE SPECIFIC CSS

FOR SMALL WEB SITES

contact.css

gallery.css

news.css

about.css

univ.css

home.css

UNIV + SUB + PAGE SPECIFIC CSS
FOR SMALL AND LARGER WEB SITES

contact.css

gallery.css

news.css

about.css

univ.css

home.css

sub.css
