Homework Project: Functional Specifications Document

Assignment: Based upon your brainstorming session, create a functional specifications document that details the features and functionalities of the web site. It should consist of three parts:

- **Feature List**
  - o   A list of features in order of priority.
- **Page Functionality & Content**
  - o   A page-by-page breakdown/description that includes a list of the primary content areas and features found on each page of the site.
- **Flow Charts**
  - o   Using your user profiles and scenarios, create at least one user flow chart that visually demonstrates how one user may interact with the site.

Format: 8.5"x11" .pdf. Post a link to the document on your class web page before class begins.
