Resolution of the Leeward Community College
Faculty Senate

Whereas the faculty of Leeward Community College cannot teach any less due to accreditation requirements relative to Carnegie Units, and

Whereas the faculty at LCC are being asked to do the same work — if not more in accommodating additional students due to a 21% increase in enrollment — for less pay, and

Whereas the so-called “negotiations” on the part of University Administration on behalf of President Greenwood have been a series of immutable ultimatums relative to pay cut and payroll lag, and

Whereas it is a misuse of the negotiation procedure to claim impasse to abrogate an existing contract,

Therefore be it resolved that the Faculty Senate of Leeward Community College calls upon President Greenwood to rescind her unilateral action to reduce faculty and lecturer salaries; and commence a comprehensive review of all overhead expenditures, both in programs and personnel, including administrative activities, not directly related to teaching, research, and scholarly activities;

And be it further resolved that she engage the ACCFSC as partners in finding more effective and efficient methods of offering higher education throughout the State; and call upon the entire university to advocate restoration of proper funding of public education for the citizens of our State, taking all other actions necessary to receive federal, state, and private sources of funding.
