Uploading grades from i>grader to Laulima

If you use i>clickers in your course, you can upload polling information to Laulima using the "iClicker Gradebook Upload" tool. This creates a gradebook item indicating which students had participated in an i>clicker session, and may help with tracking attendance or participation. Note that this does not track each student's particular vote in a poll.

"iClicker Gradebook Upload" and 'Gradebook" are not part of Laulima's default set of tools. Click on Site Info and Add the tool using "Edit Tools"

You will need to conduct at least one i>clicker session. After students have registered their remotes in class and have been polled, you can then upload the information to your course space.

When the i>clicker session is complete, run i>grader.

Check the box at the top of each column you want to export.

Go into your course in Laulima and click on the "iClicker Gradebook Upload" link on the course menu.

Browse for the file then click "Submit" to upload the file to Gradebook.

The information should have been uploaded. (Click on the "Return to Main Page" link to reset the tool.)

This will create an entry in Gradebook with the i>clicker data. To view the scores, click on the title.

You may need to edit the item's settings to release the information for each student or to include it in the final grade calculation.
