Business ain't booming
By Nikki Gregory
...but we're not hiring right now. It's a little too familiar? Senior Mark Mazzero thought so. "I felt like I got let down," but I'm going to be a little more specific. I'm just going to go back."
Along with many others, James Vinson shared Mazzero's pain. "I was rejected over and over again."
"I applied to several places," Vinson said. "I was flabbergasted and I was late when not one of the places I applied to called me back."
Senior Alex Morency found another reason for the disappointing search for his band, ANEW. They played paid gigs at local CDs and T-shirts promoting their band.
"I would call us entrepreneurs in a sense because we market our own music," Morency said.
For junior Erik Maki, the struggle of finding a job was a simple solution: all he needed was a Florida driver's license and a beach.
"I'm regarding this as a great job because I get paid for it."

Summer lovin'
"I went to a dance with my friends and we had a great time." (1) Senior Chris Garcia brings home a new car. (2) Lighter-grader Kristina Manning takes a sun-soaked golf course. (3) Taking a break from swimming, junior Paul Quiñones chills on the beach with his friends. (4) Trying to find a summer sweet, seniors Kelly Kambouzis and Megan Galia apply perfume on themselves in Macy's.

"We try to have a "threepeat" on each spread bringing part of our theme (in this case the circles and arrows) to the spread three times. Our rails feature different coverage modules and showcase deserving content elements helping us incorporate the threepeat reinforcing the visual look of the book."

Taylor Zimmerman

The rails provide a visual link throughout the book. We put the rails on the page and then design the spread modules as entities separated by the rails. One of our goals is to get each student in the book at least three times. The rail-separated packages give us a cool way to give attention to students who otherwise might not get into the book while avoiding an overcrowded design.
